

HOLZ OIL

DECORATIVE AND PROTECTIVE PRODUCT FOR SURFACE TREATMENT OF WOOD, STONE AND CONCRETE

PURPOSES

Holz Oil protects and cares for wood, stone and concrete surfaces. It is suitable for both **internal** and **external** use. It could be used for processing new and previously oiled wood for residential and domestic buildings (facades, wooden terraces, garden and outdoor furniture, windows, doors etc.). Holz Oil forms a thin film on the surface that protects and smoothes the surface. It has both decorative and protective effects as it provides protection from water and weather conditions.

MAIN ADVANTAGES

- Holz Oil is created by introducing innovation to the formula of natural oils;
- Provides natural protection to the wood;
- Great absorbency;
- Does not contain biocides;
- Resistant to weather conditions.

DIRECTIONS FOR USE

Before applying Holz Oil, always clean the surface of all dust, dirt or other contaminants. Holz Oil may be applied with a brush, roller at the temperature above +5°C (with humidity under 80 %). The moisture content of the timber to treat should not exceed 20%. If necessary it can be diluted with white spirit. Oil tinting is possible by adding a pigment.

Apply 2–3 coats with an interval of 40 minutes with normalized total consumption being 60 –80 g/m² (1L on 12–16 m², for planed wood - consumption being 1L/10-15 m², for sawn wood - 1L/5-8 m²).

Before processing untreated wood with oil, pre-treat the surface with wood protection (Holz Bio, Grunt Natur etc.).

The extra oil can be removed by sponge or clean textile. After completing the work, tools and equipment should be cleaned with soap and water or white spirit.

NB! Do not process frozen wood! Stir thoroughly before applying! Do not mix Holz Oil with other products!

STORAGE AND TRANSPORTATION

Store and transport Holz Oil in hermetically sealed original containers separately from food products. Keep at temperature above -5°C. The storing period of the product is 36 months.

COMPOSITION

Natural oils, white spirit, siccative and additives.

SAFETY MEASURES

Keep locked up and out of the reach of children. Do not get in eyes, on skin, or on clothing. Rinse thoroughly in case of contact with eyes or mouth. Get medical advice/attention if you feel unwell. Use only outdoors or in a well-ventilated area.

NB! Holz Oil is a flammable liquid! It is necessary to comply with fire safety! Oil-contaminated rags collect and place in a fire-resistant container. Do not pour into drains and waterways! Should not be disposed with other household waste.
